

Go to <https://solarsystem.nasa.gov/planets/overview/> and use the "Planets" tab to find the relevant information.

| Planet | Average Distance from Sun (km) |
|--------|--------------------------------|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

Question:

What is the order the eight planets are from the sun (from shortest to longest distance)?

| Planet | Equatorial Radius (km) |
|--------|------------------------|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

Question:

What is the order the eight planets (from smallest to largest equatorial radius)?

| Planet | Surface Gravity (m/s ²) |
|--------|-------------------------------------|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

Questions:

Which planet (assuming there was a surface) would allow you to jump the highest?

Which planet (assuming there was a surface) would allow you to jump the lowest?
